SUMMARY

Motivated Computer Engineering student seeking OJT experience to apply programming expertise in real-world projects. Skilled in C, C++, Python, and Java, with strong foundations in database systems, algorithms, and software troubleshooting. Quick to learn new technologies and eager to contribute to innovative software solutions that enhance efficiency and performance.

ACADEMIC EXPERIENCE

- Completed coursework in Java, Python, C++, and C, building strong foundations in programming logic, object-oriented design, and performance optimization.
- Developed automation scripts and data analysis tools in Python, applying libraries such as Pandas and NumPy for academic exercises.
- Applied numerical methods in academic exercises, such as implementing root-finding algorithms and testing convergence in programming assignments.
- Contributed to team-based projects evaluating embedded systems for IoT applications, conducting simulations, hardware integration, and literature reviews.
